PROFESSIONAL SUMMARY

Results-driven IT Infrastructure Specialist and Pre-sales Supervisor with over 10 years of experience in enterprise networking, server virtualization, system governance, and technical proposal development. Proven experience acting as IT Manager, leading annual OPEX and CAPEX budget planning, managing vendor SLAs, and ensuring business continuity (DRP/BCP). Skilled in architecting solution designs (FortiGate 200F, L3 Switches, Ruijie/Reyee), cloud deployment, drafting SOW/BOM documents, and developing SAP API integrations.

MANAGEMENT EXPERTISE

- IT Budget Planning:** Annual OPEX and CAPEX forecasting and cost control.
- Vendor & SLA Management:** Contract negotiation, supplier selection, and SLA enforcement.
- IT Governance:** Policy enforcement aligned with ISO 9001 and ISO 27001 standards.
- Business Continuity:** Disaster Recovery Plan (DRP) design and testing.
- Team Leadership:** Technical team leadership, task delegation, and performance reviews.

PROFESSIONAL EXPERIENCE

EOLO Technology Co., Ltd.

Pre-sales Supervisor

2025 - Present

- Conducted technical site surveys and requirement gathering to architect client-tailored infrastructure solutions.
- Prepared comprehensive technical proposals, TOR, SOW, BOM, and Cost Sheets.
- Designed enterprise network structures, FortiGate 200F failovers, Layer 3 Switch configurations, and Ruijie/Reyee solutions.
- Managed Microsoft 365 / Google Workspace cloud migrations and Bitdefender Enterprise security deployments.
- Oversaw Dell PowerEdge server deployments and defined functional specs for SAP API workflows.

Techno-Metal Co., Ltd.

IT Leader / Acting IT Manager

2024 - 2025

Executive & Management Responsibilities

- Managed annual departmental IT budget planning (OPEX / CAPEX) and resource allocation.
- Negotiated contracts with vendors, managed procurement, and enforced Service Level Agreements (SLAs).
- Administered core IT infrastructure including Windows Servers, Active Directory, VMware, and FortiGate networks.
- Enforced information security compliance in accordance with ISO 9001 and ISO 27001 standards.
- Structured and executed Disaster Recovery Plans (DRP) to guarantee continuous business operation.

OKAYAMA (THAILAND) CO., LTD.

IT Support & System Administrator

2016 - 2024

- Maintained domain servers, email systems, LAN/WAN infrastructure, and surveillance platforms (NVR, DVR, XVR).
- Developed internal PHP web applications for warehouse inventory and production management.
- Delivered level 1-3 helpdesk support and user access permission management.

KEY PROJECTS

- EoloSystem (Pre-sales & Quotation Platform):** Architected and developed an enterprise pre-sales management platform featuring automated Cost Sheet calculation, job assignment workflows, and quotation approval tracking.
- AI Tele-Sales & Call Automation Platform:** Built an AI-driven Voice Tele-sales system integrating LLM APIs and Voximplant Telephony Provider with lead tracking, knowledge base management, and transcript analytics.
- Enterprise TMS & Defect Dashboard (TPI Polene):** Designed and implemented Transport Management Systems (TMS) and analytics dashboards incorporating automated delivery planning and real-time defect reporting.
- Corporate Vehicle Booking System:** Developed an end-to-end corporate vehicle reservation and driver dispatch management platform with automated approval workflows and RESTful APIs.
- Enterprise Network & Failover Infrastructure:** Designed and deployed high-availability network architecture featuring FortiGate 200F, Layer 3 Switches, and Fiber Optic infrastructure for 50+ enterprise clients.
- Smart AI CCTV Surveillance Solution:** Architected AI-powered CCTV surveillance and thermal/facial recognition solutions tailored for enterprise security requirements.
